MADHAV E-COMMERCE SALES DASHBOARD USING POWER BI

Objective:

- Owner of Madhav store wants us to help them create a dashboard to track and analyse their online sales across India.

Project Learnings:

- Created interactive dashboard to track and analyse online sales data.
- Used complex parameters to drill down in worksheet and customization using filters and slicers.
- Creates connections, join new tables, calculation to manipulate data and enable user driven parameter for visualization
- Used different types of customized visualization (bar chart, pie chart, donut chart, clustered bar chart, scatter chart, line chart, area chart, map, slicers, etc)
